ELSEVIER

Volume 395, Numbers 1–2, 10 October 1995

JOURNAL OF
ELECTROANALYTICAL
CHEMISTRY

Contents

Regular papers

A description of electrified interfaces based on methods of statistical field theory
J. Stafiej (Warsaw, Poland), J.P. Badiali (Paris, France) and Z. Borkowska (Warsaw, Poland) 1

Non-reversible charge transfer and mass transfer: Methodology for experimental characterization without theoretical models
E. Vieil and F. Miomandre (Grenoble, France) 15

Potentiostatic differential capacity measurements: frequency limitations
C. Koehler, J. Lecoeur and J.P. Bellier (Meudon, France) 29

Computer simulation of a square scheme with reversible and irreversible charge transfer by the network method
C.F. González-Fernández (Cartagena, Spain), M.T. García-Hernández and J. Horno (Jaén, Spain) 39

Analysis of hydration number in cobalt oxyhydroxide films using the quartz crystal microbalance
Y. Matsumoto, N. Bando, J. Hombo (Kumamoto, Japan) and T. Sasaki (Ibaraki, Japan) 45

Concentration distribution of conducting species with time resolution in electrochemical undoping process at the polypyrrole-film-coated electrode in the light of electric percolation
Y. Tezuka, T. Kimura, T. Ishii (Tokyo, Japan) and K. Aoki (Fukui-shi, Japan) 51

Electrochemical characterization and morphological studies of palladium-modified carbon ceramic electrodes
J. Gun, M. Tsionsky, L. Rabinovich (Jerusalem, Israel), Y. Golan, I. Rubinstein (Rehovot, Israel) and O. Lev (Jerusalem, Israel) 57

Measurement of membrane conductivities using an open-ended coaxial probe
C.L. Gardner and A.V. Anantaraman (Ottawa, Canada) 67

Electropolymerization of acrylamide at high current density in aqueous media
T.F. Otero and I. Cantero (San Sebastian, Spain) 75

Phase transitions in uracil adlayers on Ag, Au and Hg electrodes—substrate effects
Th. Wandlowski (Ulm, Germany) 83

Comparative electrochemical behaviour of CO_2 on Pt and Rh electrodes in acid solution
M.L. Marcos, J. González-Velasco (Madrid, Spain), A.E. Bolzán and A.J. Arvia (La Plata, Argentina) 91

On the structure of the Pt(100) and Pt(110) electrode surface in iodide solutions
J. Albers, H. Baltruschat and I. Kamphausen (Bonn, Germany) 99

Design of solid electrolytes for use with dissimilar gas electrodes
S. Mukhopadhyay and K.T. Jacob (Bangalore, India). 107

A study of the Pd/highly oriented pyrolytic graphite electrodeposition system by in situ electrochemical scanning tunnelling microscopy
X.Q. Tong, M. Aindow and J.P.G. Farr (Birmingham, UK) 117

Derivatization of surfaces and self-inhibition in irreversible electrochemical reactions: cyclic voltammetry and preparative-scale electrolysis
I. Bhugun and J.-M. Savéant (Paris, France) 127

Surface electrochemistry of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyl-2H-tetrazolium bromide ([MTT]Br) adsorbed on a graphite electrode
E.P. Marques (Sao Luis, Brazil), J. Zhang, Y.-H. Tse, R.A. Metcalfe, W.J. Pietro and A.B.P. Lever (North York, Canada) 133

Mediator-modified electrodes for electrocatalytic oxidation of NADH
B. Gründig (Münster, Germany), G. Wittstock (Leipzig, Germany), U. Rüdel (Münster, Germany) and B. Strehlitz (Leipzig, Germany) 143

Anionic clay modified electrodes: electrochemical activity of nickel(II) sites in layered double hydroxide films
J. Qiu and G. Villemure (Fredericton, Canada) 159

Electrode reactions of nitroxyl radicals. XI: Coulometric experiments on the oxidation of aliphatic alcohols by oxoammonium cations
B. Chmielewska, P. Krzyczmonik and H. Scholl (Łódź, Poland). 167

Competitive photoanodic oxidation of halide ions and water at a TiO_2 thin film electrode: an in situ photocalorimetric and analytical study
N.-S. Schaaf, I. Hahndorf and J.K. Dohrmann (Berlin, Germany) 173

Noble-metal-modified glassy carbon electrodes for ethylene glycol oxidation in alkaline medium
A.A. El-Shafei (El-Mansoura, Egypt), S.A. Abd El-Maksoud (El-Arish, Egypt) and A.S. Fouda (El-Mansoura, Egypt). 181

Electrochemistry of *s*-triazine herbicides: reduction of atrazine and terbutylazine in aqueous solutions
L. Pospíšil, R. Trsková (Prague, Czech Republic), R. Fuoco and M.P. Colombini (Pisa, Italy) 189

An in-situ Fourier transform infrared study of CO_2 electroreduction catalysed by Ni(0)–4,4′-dimethyl 2,2′-bipyridine and Ni(0)–1,10-phenanthroline complexes
P.A. Christensen, A. Hamnett (Newcastle upon Tyne, UK), S.J. Higgins (Liverpool, UK) and J.A. Timney (Newcastle upon Tyne, UK) 195

Cyclic voltammetry, ESR and spectral investigation of the electrochemical reduction of some acetyl diphenylsulphides and sulphones
E. Constantinescu, M. Hillebrand, E. Volanschi, M. Andrei, G. Ivanescu and O. Maior (Bucharest, Romania) 211

Electropolymerization of phenothiazine, phenoxazine and phenazine derivatives: characterization of the polymers by UV–visible difference spectroelectrochemistry and Fourier transform IR spectroscopy
D.D. Schlereth and A.A. Karyakin (Freising, Germany) 221

Electroreactivity of isopropanol on platinum in acids studied by DEMS and FTIRS
E. Pastor, S. González and A.J. Arvia (Tenerife, Spain) 233

Study by potential-modulated reflectance spectroscopy of the reactivity of ethanol with the passivating layer on Ni and Fe
A. Kowal and C. Gutiérrez (Madrid, Spain) 243

Absorption–desorption of deuterium at Pd95%–Rh5% alloy. II: neutron emission
G. Mengoli, M. Fabrizio, C. Manduchi, E. Milli and G. Zannoni (Padova, Italy) 249

Poisoning effects of arsenic species on H adsorption and kinetic behaviour of the H_2 evolution reaction at Pt in KOH solution
L.J. Gao and B.E. Conway (Ottawa, Canada) 261

Formal solution for the potential step problem with linear adsorption: numerical approach for non-linear isotherms
D. Krulic and N. Fatouros (Paris, France) 273

Adsorption of cyanide-containing species from dicyanoaurate solutions on gold electrodeposits
D. Poškus and G. Agafonovas (Vilnius, Lithuania) 279

Short communications

Highly selective biosensing of glucose utilizing a glucose oxidase + rhodium + Nafion® biocatalytic–electrocatalytic–permselective surface microstructure
J. Wang and H. Wu (Las Cruces, NM, USA) 287

Coupled electrochemical and radiometric study of anion migration in poly(*o*-phenylenediamine) films
K. Martinusz, G. Inzelt and G. Horányi (Budapest, Hungary) 293

Preliminary notes

Surface-enhanced Raman spectroscopy (SERS) evidence of charge transfer between putidaredoxin and a silver electrode
V. Reipa, A.K. Gaigalas, J.J. Edwards and V.L. Vilker (Gaithersburg, MD, USA) 299

Ion-selective conductometric microsensors based on the phenomenon of specific salt extraction
A.A. Shul'ga, B. Ahlers and K. Cammann (Münster, Germany) 305

CO_2 Reduction on Rh single crystal electrodes and the structural effect
N. Hoshi, H. Ito, T. Suzuki and Y. Hori (Chiba, Japan) 309

Spectroscopic investigation of electrochemical interfaces at overpotential by infrared-visible sum-frequency generation: platinum in base and methanol-containing electrolyte
A. Peremans and A. Tadjeddine (Orsay, France) 313

Anion effects upon upd copper on platinum electrodes: an illustrative coulometric analysis using solution flushing tactics
C. Wang, C.-S. Chung and S.-C. Chang (Hsinchu, Republic of China) 317

An in-situ infrared study of the immobilisation of anions in conducting polymers
V.W. Jones and M. Kalaji (Bangor, UK) 323

Fabricating electroactive azobenzene self-assembled monolayers and their characterization
H.-Z. Yu, Y.-Q. Wang, J.-Z. Cheng, J.-W. Zhao, S.-M. Cai, H. Inokuchi, A. Fujishima and Z.-F. Liu (Beijing, China) 327

On the electroadsorption of CO on Pt in methanol and acetonitrile, and the influence of residual oxygen
A. Cuesta and C. Gutiérrez (Madrid, Spain) 331

Voltammetry in the presence of ultrasound: can ultrasound modify heterogeneous electron transfer kinetics?
F. Marken, J.C. Eklund and R.G. Compton (Oxford, UK) 335

Direct electrocatalytical H_2O_2 reduction with hemin covalently immobilized at a monolayer-modified gold electrode
T. Lötzbeyer, W. Schuhmann and H.-L. Schmidt (Freising-Weihenstephan, Germany) 341
